HARD SKILLS

PERSONAL PROFILE

1 years of programming experience

I'm a Web Developer, I make and Develop application using web technology like MongoDB, Express, ReactJs, Node Js, and other. The work ethic, and discipline that I have practice will carry me being a professional web developer.

EDUCATION

● SMK Doa Bangsa

Rekayasa Perangkat Lunak

2017 - 2020

I was study about computer and software which is more focused on programming. I'm more interested about programming.

ORGANIZATION

● Scouts

Member —● Leader —●

2014 - 2020

This organization aims to build a strong character and good character. Not only that, I have learned about leadership skills and managing organizations..

INTERNSHIP

● PT. Qtasnim

Okt - Dec 2018

Learn about how to build a website display such as a landing page using Html, CSS Javascript and react js to speed up the process. Also learn about logical thinking in programs and share experiences with senior programmers..

● Online Shop

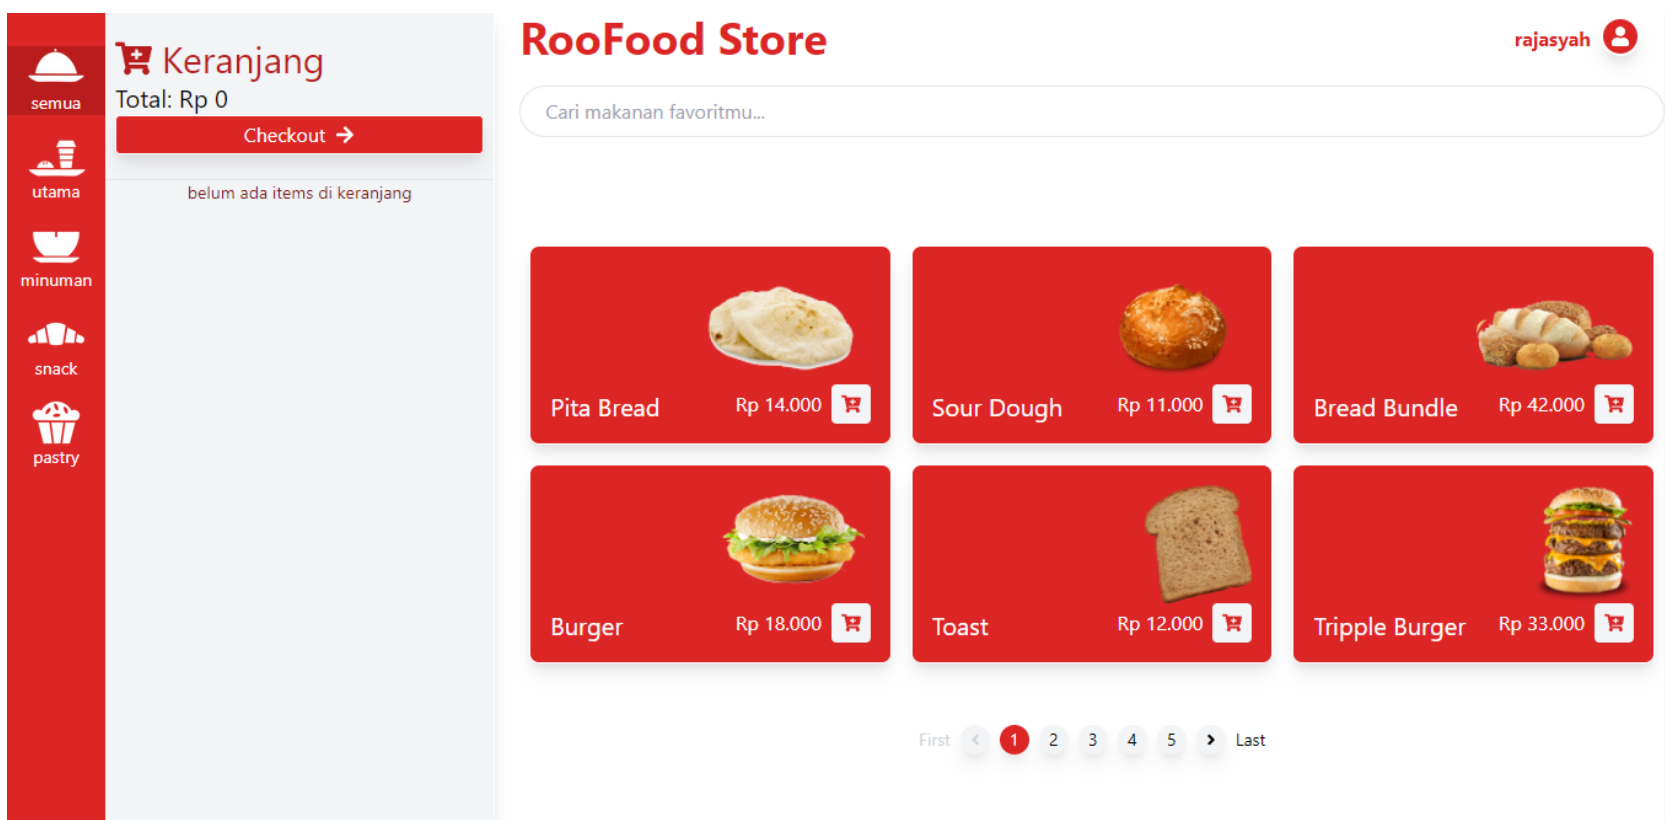

MongoDb, Express, React, Node Js

<https://www.github.com/rajasyah>

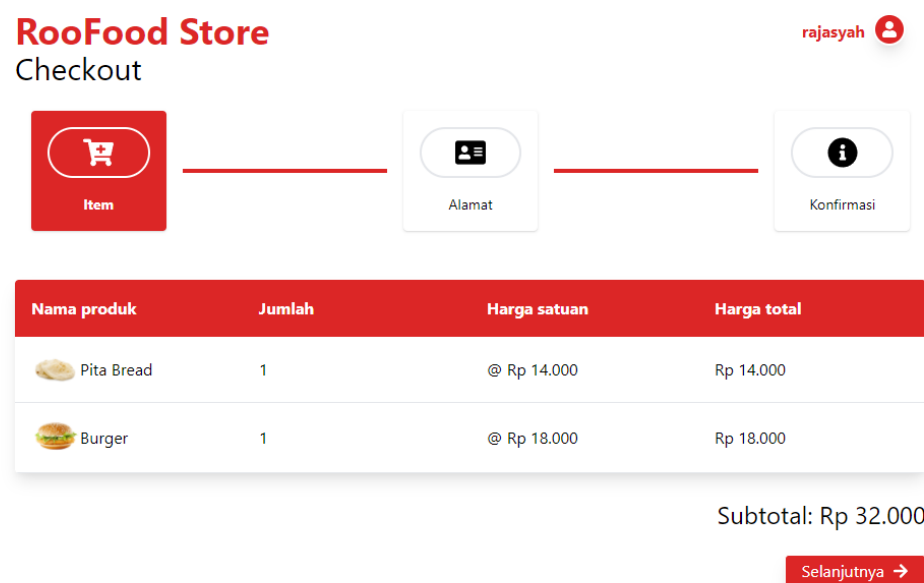

This online store is built for shopping. It has many features for users like the average online shop. Users can register, login, manage cart and place product orders, also can view product order status.

Application Sort Demo

1. the start page when you access this website, you can see the menu list, cart, sidebar on the left as well as your account.

● Crypto Tracker

React, Css, Axios, API

<https://www.github.com/rajasyah>

I created this website to make it easier for users to track crypto market prices in a simple and informative display.

1. I use reactjs as a library in this project and for the appearance I only use css without using other libraries or frameworks.

2. I provide a search feature on this website to make it easier for which crypto you want to know.
